Claim 19 has been canceled thereby rendering the rejection moot.

New Claims

New claims 20 and 21 are presented for examination. Support for the claims can be found in paragraphs [0054], [0059] and [0063]-[0070]. The new claims further define the invention to include detecting the center of gravity of the glass substrate and creating a center

Application No.: 10/825,178

hole using the center of gravity as the center of the hole. This combination of steps is not disclosed or suggested by the prior art relied upon by the Examiner. Moreover, the references do not teach detecting the center of gravity by image processing on a two dimensional image as viewed from the direction of the thickness of the glass substrate. For all of the foregoing reasons, favorable consideration and allowance of new claims 20 and 21 is respectfully solicited.

Conclusion

If there are any outstanding issues that might be resolved by an interview or an Examiner's amendment, the Examiner is requested to call Applicant's attorney at the telephone number shown below.
